Technical Skills

- **Languages:** Java, C++, SQL
- **Technologies/Framework :** HTML5, CSS, Tailwind, JavaScript, React, Typescript, Nodejs, Express, Rest API
- **Database:** MongoDB, PostgreSQL
- **Tools/Platforms:** Git, Github, Prisma, Postman, Vite
- **Courses:** Data Structures Algorithms, Operating Systems, Computer Networks, OOPS, SDLC, DBMS

Experience

Freelancing

Fullstack Developer

Remote

Mar 2025 – Sept 2025

- Developed scalable full-stack web applications using **React, Node.js, Express, and PostgreSQL**.
- Built optimized REST APIs with **JWT** authentication, integrated **Google OAuth**, and managed databases via **Prisma ORM**. Configured custom domains, managed **DNS** records, and integrated email services such as **Resend, postmark, autosend**.
- Delivered responsive and production ready solutions and deployed on **Vercel, Railway, and Render**.

GirlScript Foundation

Frontend Developer

Remote

May 2023 – Aug 2023

- **Interface Development** Led the development of intuitive interfaces for live projects, improving navigation and increasing user engagement by 25%, which increased customer satisfaction.
- **Performance Optimization** Fixed bugs and improved website performance, reducing loading time.

Projects

Subsync - AI Powered Subscription Manager (Sep 8 – present, 2025)

[\[GitHub\]](#) [\[Live\]](#)

- **Tech Stack:** React, Tailwind, Chrome Extension APIs, Node.js, Express, MongoDB, Gemini API, autosend
- Developed and published a Chrome extension with 15+ active users to manage recurring subscriptions via an intuitive dashboard.
- Implemented auto capture using AI to extract billing details, reducing manual input by 70%.
- Integrated smart renewal reminders (7, 3, 1)days via autosend Email API, boosting on-time payments by 60%.
- Ensured privacy first storage using Chrome Storage API and added JSON import/export for seamless backups.

PayEasy- Cashless Payment (Jun 6 – Aug 30, 2025)

[\[GitHub\]](#) [\[Live\]](#)

- **Tech Stack:** ReactJS, Nodejs, Express, MongoDB, JWT, Zod, Context-API, Vite.
- Payeasy is a Full-stack digital payment platform serving 200+ registered users with real-time transaction processing, reducing payment completion time by 40% through optimized JWT authentication and MongoDB transactions.
- Implemented a responsive dashboard with real-time balance updates and user search functionality.

Sticky - Real-time GIF Search and Social Platform (Feb 21 – Jun 30, 2025)

[\[GitHub\]](#) [\[Live\]](#)

- **Tech Stack:** React, Nodejs, Express, MongoDB, Tailwind, Giphy API, JWT, Context API, O-Auth Passport.js
- Engineered a GIF discovery platform that attracted 100+ registered users, featuring real-time search across trending categories, GIFs, stickers, and text content through seamless Giphy API integration.
- Integrated Google OAuth authentication system using Passport.js, reducing authentication time by 60%
- Utilize chrome local storage with like, share, and download capabilities, increasing user session retention time.
- Enhanced performance with lazy loading and data caching, cutting page load time.

Education

Guru Gobind Singh Indraprastha University

Bachelor of Technology - Computer Science; CGPA: 8.52

Delhi, India

July 2021 – June 2025

Achievements

- **Ranked Top 15 Contributors**– GirlScript Summer of Code 2023 (out of 1,500+ participants).
- **First Position** – IEEE Technorax Hackathon 2022.
- **HacktoberFest** – Contributed to 8+ open-source projects, with 13 merged pull requests.
